## PROJECT

**I-CCM — Groovy, Inspire Automation,Inspire Designer, Sql**

❖ The I-CCM project systematically generates a variety of statements, globally delivering them to customers via email and PDF formats. Automation is seamlessly integrated to enhance operational efficiency, minimize errors, and establish a comprehensive strategy for effective customer communication.

❖ Integrated RESTful APIs for streamlined data fetching, leading to a notable acceleration in data retrieval and a substantial 50%boost in overall system efficiency.

❖ Implemented statistically optimized database procedures to facilitate a rapid 25% retrieval improvement of customer data, precisely engineered for efficient PDF generation.

❖ Addressed and rectified 15% of production issues, including critical bugs, within the live environment.

❖ Exposed RESTful APIs within ICCM are made accessible enterprise-wide, allowing consumption by various applications across the entire ICICI BANK.

## SIDE PROJECTS
